

Timekettle X1 AI Interpreter Hub

The World's First Innovative Multi-Language,
Multi-User AI Hub for Simultaneous Interpretation.

Unique Stand-alone Device, Tapping is Connecting

Built-in stand-alone system, instant set-up with a double-click, tap another X1 for seamless real-time interpretation. X1 ensures ultimate efficiency without extra equipment, saving your time and budget for more.

Allow 20 People Talk in 5 Languages

Tap to connect, set up your exclusive conference room online or offline with X1. HybridComm provides multiple translation channels, allowing you to express yourself in your language and everyone else understands it, effortlessly facilitating flawless communication for everyone in the meeting.

Share the Earbuds, Instant Interpreting

X1 ensures an effortless connection – take out the earbuds, no setup time. Built-in stand-alone device for uninterrupted conversations. Save time, connect easily, and let communication flow smoothly.

Listen & Understand the Unknown Languages

Breaking barriers in meetings with its multi-way input system, understanding the unknown language with X1. Listen all the time when you need it, and speak when you like, turning every interaction into a joyful experience.

Achieve Remote Meeting By One Dial

Call with X1 unique six-digit number, it ensures uninterrupted conversations whether online or offline, turning every spoken word into translated speech in 40 languages—your on-the-go translator!

Be a Handheld Translator for Small Talk

Turn X1 into a handheld translator with one click—initiate cross-language conversation in no time. Transform strangers into friends with delightful, meaningful small talk in every encounter.

Translate Any Video or Audio to What You Understand

Transform X1 into your online language assistant, making foreign content instantly accessible during TV shows or broadcasts. Seamless translation for information at your fingertips, anytime, anywhere.

Expand Your Speech to Different Language Audiences

Connect to the screen, deliver a speech in your language, create an international presentation to link with your audience in their native languages. With X1, language is no longer a barrier, but a bridge in speech.

HybridComm[®]

System in Timekettle Earbuds

An exclusive patented system includes voice processing, simultaneous interpreting, and AI translation owned by Timekettle. Which maximizes the recognition accuracy, precision, and response speed of the translation anywhere and anytime.

BoostClean

Precision in Voice
Recognition

To capture sounds from specific direction and distance, eliminate interferences from ambient noise, and uses RNN to extract and process only human speech segments.

TurboFast

Processor Between
Languages Transformed

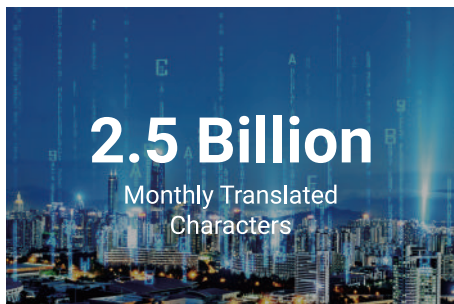

Creating a multi-channel processing for voice transmission via Bluetooth enables acquisition, transfer, and output in various languages.

UniSmart

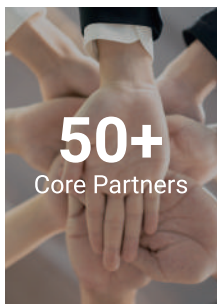

Stable Service
All Over the World

Building more than 150 servers and accelerators all over the world, and integrating the world's top translation engines for localizing different languages.
